“Consol Recently decided to revamp our Audio / Visual  
and Video Conferencing facilities”

“Consol Recently decided to revamp  
our Audio / Visual and video  
conferencing Facilities at our head  
office in Wadeville.

We chose Galdon Data as our  
supplier for this Project. We have  
worked with them before in the past  
and we were happy and trusted  
them to advise us on this project  
aswell.

We're extremely happy with the  
service we have received from  
Galdon data. The team worked  
quickly and professionally and  
continued to support us in our  
various environments.

Collaboration is very important to  
Consol, and so we've deployed  
technologies that are easy to  
understand and easy to use.

This allows our users to spend more  
time working together, and less time  
worrying about how the technology  
works.”
